B.T.S

1. OVERVIEW

B.T.S Token is a blockchain-based digital asset that can revolutionize the payment experience for global fandom. It is designed to make it easier for global fans to access B.T.S-related products and services by solving the existing complex payment process and currency fluctuations. This token is more than just a payment method, in the sense that it offers fans a variety of benefits through features such as staking and token events, and promotes a more active community.

2. BACKGROUND AND ITS NECESSITY

As B.T.S is an artist with a wide fan base around the world, the demand for related merchandise and services is constantly increasing. However, global fans are facing the following problems while purchasing merchandise:

- **PRICE FLUCTUATIONS DUE TO EXCHANGE RATE VOLATILITY**
- **RESTRICTIONS ON INTERNATIONAL PAYMENT METHODS**
- **PAYMENT AND DELIVERY ISSUES IN SOME COUNTRIES**

B.T.S Token is designed to address these issues and help fans to access products and services more easily. In addition, it aims to maximize the fan experience by providing various additional benefits using the token.

B.T.S

3. KEY FEATURES OF B.T.S TOKEN

3.1 PAYMENT SYSTEM

B.T.S Token is utilized as a payment method that can be used to purchase B.T.S. fan-exclusive merchandise. While regular fiat currencies can fluctuate in price due to exchange rate volatility, B.T.S Token provides a stable payment experience through its own stable strategy and automatic price adjustment at the time of payment. This allows global fans to purchase products at predictable prices, minimizing uncertainty during the payment process.

B.T.S Token's stable strategy is implemented as follows:

- **RESERVE-BASED VOLATILITY MITIGATION:**

B.T.S Token adopts a method to reduce volatility by utilizing reserves linked to certain fiat currencies and major stabletokens.

- **SMART CONTRACT AUTO-ADJUSTMENT FEATURE:**

The token's price is automatically adjusted based on market data at the time of payment, designed to maintain constant price stability.

- **ON-CHAIN PRICE FEED INTEGRATION:**

B.T.S Token utilizes major exchanges and Oracle services to adjust prices in real time and react to market volatility.

B.T.S

3.2 STAKING SYSTEM

The planned staking feature will allow fans holding B.T.S tokens to receive additional benefits. The following rewards will be available to staking participants:

- Discount coupons for merchandise
- Pre-purchase opportunities for special events and concert tickets
- Access to limited edition NFTs and digital content

3.3 TOKEN EVENTS

B.T.S Token plans to hold various events to activate the fan community. For instance, tokens as rewards for completing certain missions or vouchers to purchase limited edition merchandise will be offered.
